

# Elizabeth Micaela Gurdzel

## FULLSTACK - FRONTEND WEB DEVELOPER

I am a **responsible**, **positive**, and **organized** individual with experience working in teams. Currently, I am seeking to further develop my skills in the IT industry and take on new challenges to grow both in terms of programming languages, areas tech related and personal abilities. I am committed to giving my best effort to meet the required expectations and continuously improving in areas where I may be lacking.

## PROFESSIONAL EXPERIENCE

### FULL STACK WEB DEVELOPER

Academic project. Henry Bootcamp | Jun 2023 - Jul 2023

An application aimed at being a video game library with the goal of staying updated with all the existing video games on the internet. It includes a search feature by name and the ability to create a card for your own video game, allowing you to edit or delete it. It also offers the option to filter all games, whether they are user-created or sourced from an external API.

Front: React - Redux Back: Node.js - Javascript.  
Database: PostgreSQL y Sequelize.

### FRONTEND WEB DEVELOPER

Caravana Social | Ago 2023 - Sep 2023.

The page consists of a job board that provides users with the opportunity to receive training. Companies can post their job listings and offer training. It helps organizations integrate individuals with disabilities, those in challenging situations, and those recovering from problematic substance use. With a team composed of 8 people, we were able to work collaboratively with cooperation and communication.

My contributions:

- Creating registration forms with error handling and validations.
- Designing the company profile details for user viewing.
- Implementing the ability to update user profiles
